

## Press Release 03/2013

### Master Online Advanced Oncology Program of Ulm University goes in fourth round

In October, the Vice President for Teaching of Ulm University welcomed the fourth cohort of students of the Master Online Advanced Oncology program. The home countries of the students (Egypt, Armenia, Bolivia, Brazil, Germany, India, Kenya, Lebanon, Libya, Nigeria and Poland) reflect the world-wide demand of this unique postgraduate program in Advanced Oncology.

Following the formal welcome address and enrollment ceremony, the students received an administrative and technical introduction in preparation for the study program. As the program is mainly performed online, the contents of the introductory seminar focused on the structure of the learning platform, interactivity and e-Learning. Furthermore, the Module Coordinators provided an overview on the professional study contents (Interdisciplinary Oncology, Clinical Research, Advanced Therapies and Integrated Concepts and Management). Overall, more than 130 online-lecture units supplied by 150 experts in the field are offered to the students.

The first attendance seminar was completed with a visit of the Comprehensive Cancer Center Ulm. This institution is a certified Oncology Centre and one of the cooperation partners of the Master Online Advanced Oncology program. It provides the basis for innovative and practice-related lectures. The students were impressed by the professionalism and internationality of the study program. Another profound partnership has been established with the European School of Oncology (ESO) that supports the study program with a scholarship program and hosts the annual ESO-ESMO Masterclass in Ermatingen, Switzerland.

Details on the online application procedure and the program's contents may be retrieved from our website at [www.masteroncology.de](http://www.masteroncology.de). Kindly visit us at <http://www.facebook.com/msc.advancedoncology> or watch our promotional video. We are looking forward to your application!
